NAVIGATOR

DIGITAL WEIGHT INDICATOR FEATURES:

Cardinal's 225-SCD digital weighing system allows you to troubleshoot directly from the indicator which provides real-time operator diagnostics for potential problems. The 225-SCD provides on-screen viewing of individual load cell report data, ensuring quick and concise information on your scale's performance.

Optional Ethernet or PLC interfaces

MADE IN USA

LEGAL FOR TRADE

Certificate of Conformance No. 89-071

Displays load cell weight, dead load, and real-time fluctuations in weight. Up to three scale weights and total displayed simultaneously.

Displays total number of errors for each individual load cell. Supports up to 20 digital load cells.

The right column displays the difference between the original calibrated dead load and any working dead loads.

Displays individual serial number rev levels and software levels in each load cell.
