

MULTI-PLATFORM LOW PROFILE MOTOR TRUCK SCALES

Cardinal Scale's USA-made multiple platform truck scales weigh multiple axles plus total weight simultaneously, which is commonly needed for highway weigh station law enforcement purposes. Each platform can function individually as its own scale. Available in steel or concrete deck platforms with impervious hydraulic or electronic load cells, Cardinal's multiple platform scales are NTEP legal-for-trade and available in various platform sizes for your facility, as listed below.

Cardinal features a wide variety of USA-made stainless load cells for use with all weighing systems. From electronic load cells to resilient hydraulic load cells that carry a lifetime warranty, each model is available in a range of capacities. Cardinal's superior hydraulic load cell models provide accurate weighing in harsh conditions because they are water-proof and immune to lightning. Choose one of Cardinal's reliable load cells to keep your scales or weighing systems running smoothly.
